

Pressure Distribution

System layout

Do the Preferred Dose Volume and Distribution System Match?

If the five-times volume is greater than the preferred volume per dose, redesign the lateral system

Daily Volume (use average)	_____	Volume in laterals, including header	_____
Number of Doses per day	_____		
Volume per dose	_____	↔ Five times volume in laterals	_____
Plus volume to fill effluent piping and header	_____		
Total volume	_____		

This chart contains an abbreviated set of steps and site specific factors may need to be considered.
